

Digital Divide

By ABD

What it is

- ▶ Digital divide is basically a barrier between people who have access to technology and those who don't.
- ▶ This definition can also apply to people who have limited access compared to those who have full access to technology.
- ▶ A person who has access to technology from an early age is known as a digital native.

How it affects people

- ▶ Well, it can sort of create a divide in knowledge because information in this age is more easily accessed by technology. (Not a word Ayham)
- ▶ It creates a sort of class and psychological difference between people because people with access to technology are different from those who don't have access. (this point is not for debate)

What are the solutions

- ▶ Governements must help people gain access to technology in rural area so that they can be connected to the world and will be bale to compete with them.
- ▶ Must also teach the correct way of using technology so people don't abuse it

▶ Thank u All (No questions should be asked because I'm always correct)
